# Every case connected. Every job in view.

Bring service cases, technician assignments, parts and billing together in one workspace, from the first call to completion.

Original platform design reference; fictional data. AI-generated device scene.

## Manage the work

Create cases, schedule visits and assign the right employee.

## Connect the parts

Track store stock, employee inventory and stock movements.

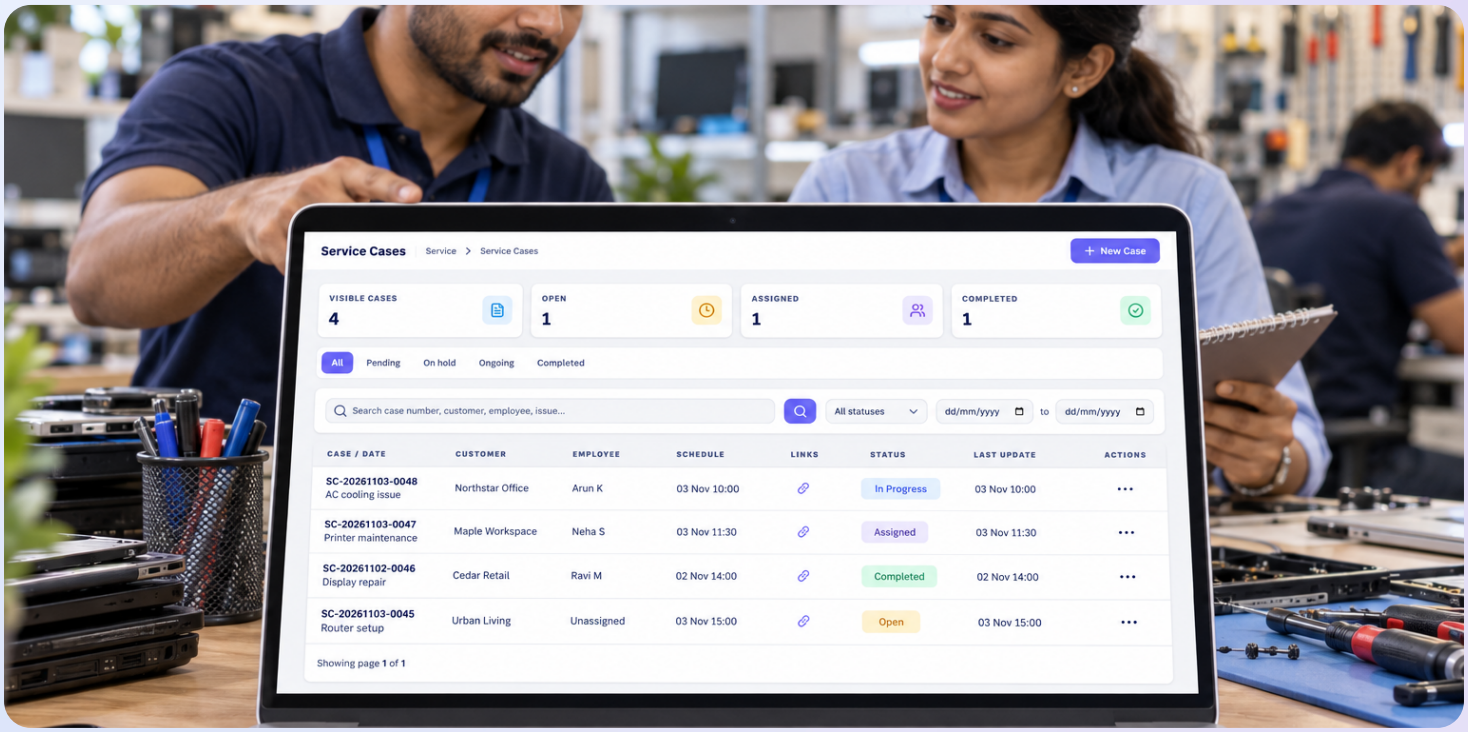

## Clarify the billing

Review company warranty and customer-billed service sales.

FROM THE FIRST CALL TO THE FINAL UPDATE

# Create. Assign. Resolve.

Give your service team a clear view of customer issues, schedules and case progress.

Original case layout reference; fictional records. AI-generated workshop scene.

## 01 Capture the issue

Create service cases with linked customers, issue notes and supporting information.

## 02 Assign & schedule

Choose an employee and record the scheduled date for the service visit.

## 03 Follow the progress

Review open, assigned, in-progress, on-hold and completed cases.

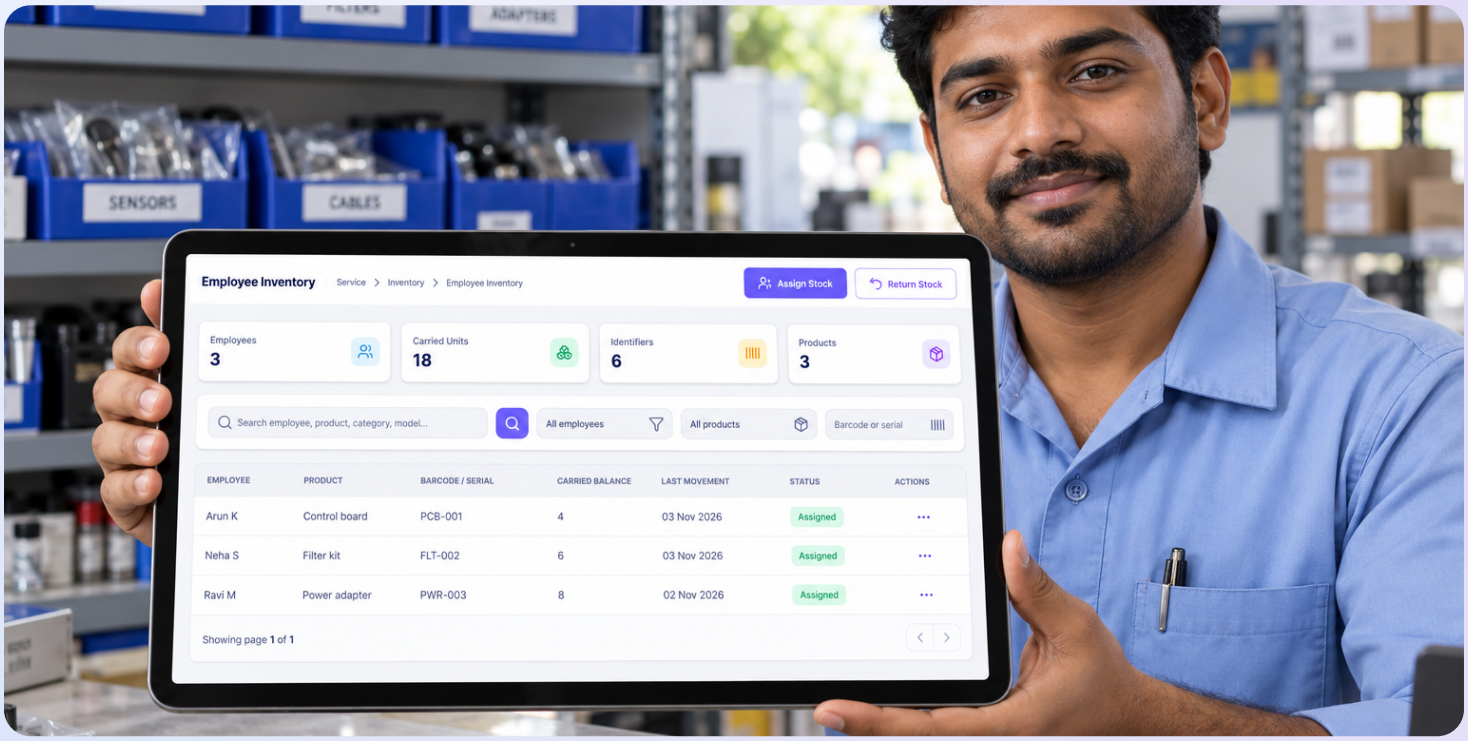

## 04 Keep the case history

Review issue and resolution notes, linked sales and inventory movements.

KNOW WHAT IS IN STORE AND WITH THE TEAM

# Parts ready. Team ready.

Connect your service operation to product stock, employee balances and movement records.

Original employee inventory layout reference; fictional data. AI-generated scene.

## 01

### Store inventory

Review products and stock held in the store before assigning parts to employees.

## 02

### Employee inventory

See who carries each product, along with quantities and barcode or serial details.

## 03

### Assign & return stock

Record stock assignments and returns as parts move between store and team.

## 04

### Movement timeline

Review stock movement records and track damage or wastage when it occurs.

SEE THE WORK AND THE BUSINESS BEHIND IT

# Service delivered. Details covered.

Connect service activity with billing, purchasing and the records your team needs.

## 01

### Warranty & billing

Review company warranty amounts and customer-billed service sales in the dashboard.

## 02

### Service sales

Record service invoices and review the sales linked to a customer case.

## 03

### Purchases & suppliers

Manage purchase records and supplier information for your service operation.

## 04

### People & reporting

Manage staff and roles, review reports, and keep working notes in the same platform.

## Built around the way your team works.

Bring a sample service case, a parts list and a billing example.
Explore the workflow from assignment and stock to completion and invoicing.

## See your service workflow in action.
